Escalation route

STEP	ESCALATE TO
1	Duty manager
2	Head of IT operations
3	Chief Information Officer
4	Chief Executive

Role card: Incident commander

Owns the response, chairs calls, approves containment
Deputy: Bob Jones

Role card: Communications lead

Drafts and issues all internal and external messages
Deputy: Alice Smith

Continued

Procedure: Ransomware: first hour

Isolate affected hosts from the network.
Do not power off encrypted machines.
Call the insurer hotline before engaging any third party.

Procedure: Suspected data breach

Record the awareness time.
Start the regulator clock in CRAB or on paper.

Operating rule

The model proposes. One person makes. Another confirms. Nothing is erased.

Degraded operation

If live CRAB or PostgreSQL is unavailable, use these paper forms. Preserve original occurrence times and source references. Reconcile named–human transcriptions into CRAB after restoration; do not backdate the digital ledger.

Authority

Paper operation does not create new authority. Existing incident roles, compartment boundaries and maker–checker responsibilities continue to apply.
